## Professional Summary

Versatile Full-Stack & UI Developer with 3+ years of experience engineering high-performance web applications across modern frontend frameworks and scalable backend architecture. Proven track record of delivering end-to-end, reliable software solutions with seamless user experiences in fast-paced environments.

## Professional Experience

**Umar Zone Infotech (Remote), Full-Stack Web Developer** **06/2025 – Present** | Mumbai, India

- Developed 35+ responsive, production-ready web pages and reusable components with scalable UI architecture and loading skeletons. Developed frontend features in a micro-frontend architecture.
- Architected a multi-tenant headless CMS using Next.js and Node.js, enabling modular template customization across 10+ client websites.
- Worked on 9XGO, an OLX-like multi-service marketplace platform for businesses and professionals; Used Git & GitHub for version control & collaboration. Contributed throughout the SDLC, from development to deployment
- Built user onboarding, authentication, authorization, and newsletter/email notification features.

**Mindfull (On-site) Project-Based Contract, Web Developer** **04/2025 – 05/2025** | Pune, India

- Spearheaded front-end development for a real-estate platform, translating Figma wireframes into responsive React components and integrating Razorpay payment workflows.
- Collaborated with designers and deployment teams to successfully launch the website.

**gofloww (On-site), Frontend Developer** **02/2024 – 03/2025** | Pune, India

- Engineered HR, Accounting, and Mail modules using Next.js, Vue.js, TypeScript, building RESTful backend services for secure, real-time data integration. Reduced initial bundle size and page load time by 40% by implementing React lazy loading, dynamic imports, and route-based code splitting.
- Built real-time attendance tracking and analytics dashboards, streamlining daily reporting workflows and reducing data entry errors by 25%.

**Banao Technologies (Remote) Contract, Frontend Developer** **01/2023 – 01/2024** | Bengaluru, India

- Developed responsive, reusable user interfaces using React.js, TypeScript, CSS with cross-browser compatibility.
- Integrated REST APIs and optimized frontend performance for scalable, high-quality user experiences.

## Skills

|                                                                 |                                                                                      |                                                                  |                                                                  |
|-----------------------------------------------------------------|--------------------------------------------------------------------------------------|------------------------------------------------------------------|------------------------------------------------------------------|
| <b>Frontend</b><br>HTML5, CSS3, Tailwind<br>CSS, Bootstrap, MUI | <b>Frameworks / Libraries</b><br>React.js, Next.js, Vue.js,<br>Angular, React Native | <b>State &amp; APIs</b><br>Redux Toolkit, Redux,<br>Context API  | <b>Languages</b><br>JavaScript (ES6+),<br>TypeScript, Python, C# |
| <b>Backend</b><br>Node.js, Express.js, .NET,<br>Java, Python    | <b>Database</b><br>MongoDB, SQL, Firebase,<br>PostgreSQL                             | <b>Tools</b><br>Git, GitHub, VS Code,<br>Postman, Render, Vercel | <b>Fundamentals</b><br>OOP, Data Structures &<br>Algorithms      |

## Projects

**Jobsy** , Build a Full-Stack Job Portal App with MERN Stack

- Implemented secure auth architecture with HTTP-Only cookies, dual-token JWT refresh rotation, server-side RBAC, and a 70%+ profile completeness algorithm to boost application quality.
- Developed Student & Recruiter dashboards for profile management, job posting, applications, and status tracking.
- Implemented resume upload using Multer + Cloudinary with secure storage and recruiter download functionality.

**StreamSphere** , Video Discovery & Personalization Platform | MERN Stack, Context API, RapidAPI, Tailwind CSS

- Implemented JWT authentication, user profiles, Watch Later feature, likes, viewing history, & user-created playlists.
- Built RESTful APIs and reusable React components with Context API for user authentication, playlists, watch history, saved videos, and dynamic video search

## Education

**Deogiri Institute Of Technology And Management Studies** , **06/2019 – 04/2022**  
B.Sc. (Computer Science) Chhatrapati Sambhajnagar, India

## Certifications & Achievements

**ISRO:**  Overview of Geoprocessing Using Python, **C Language:**  Participated in State-Level Programming Maniac
